

Accidental Notes on the Keyless D Flute

- Fingering Chart Key:**
- Tone Hole Covered
 - Tone Hole Uncovered
 - ◐ Tone Hole Half Covered
 - X Optional
 - ⎵ Alternate ways to play the same note

The diagram illustrates the fingering for accidental notes on a keyless D flute. It features a wooden flute on the left and a musical staff on the right. The staff shows notes for Ma (F#), Fi (G#), and Le (Bb) in two positions. Below the staff is a fingering chart with six rows of finger holes. Brackets above the chart indicate alternate fingerings for the notes. The notes are labeled 'Ma', 'Fi', and 'Le' above the staff, and 'F#', 'G#', and 'Bb' below the staff.

Notes:

- This fingering chart uses the 'solfège movable doh' system.
- All of these fingerings work, but should you find any variations that suit you better, please do not hesitate to use them.
